2023 5th International Conference on Resources and Environmental Research (ICRER 2023)

December 2-4, 2023 | Hong Kong, China

KEYNOTE SPEAKERS

Xueming Chen
Fuzhou University, China

Prof. Xueming Chen received his PhD degree from The University of Queensland in 2017 and worked as a postdoc/Marie Curie Fellow at Technical University of Denmark from 2017 to 2020. He is currently a full professor and group leader at Fuzhou University. He has been working in the field of Environmental Engineering, with a particular interest in novel wastewater treatment technologies toward carbon neutrality and resource recovery. So far, he has published over 80 SCI papers, leading to an h-index of 26. Besides, he has been an associate editor/editorial board member for over 10 scientific journals including Science of the Total Environment and Journal of Environmental Management and served as an invited reviewer for over 30 SCI Journals.

Ajit Sarmah
University of Auckland, New Zealand

Dr. Ajit Sarmah is the professor of University of Auckland, Civil & Environmental Engineering, Auckland, New Zealand1 Jul 2011 - present. PhD (Soil and Water) University of Adelaide, Adelaide, Adelaide, Australia; MS (Soil Physics) University of Queensland, Brisbane, Brisbane, Australia; MEng (Soil and Water) The Asian Institute of Technology, Bangkok, Bangkok, Thailand; Bsc.Ag.Eng (Dist), Soil and Water
The University of Allahabad, Allahabad, India. His primary scientific interests are in Biochar, Waste management, Pyrolysis, Soil water and Environmental remediation. He integrates many fields, such as Biochar and Amendment, in his works. His Waste management study incorporates themes from Modulus, Thermogravimetry, Polypropylene and Elastic modulus. His work carried out in the field of Pyrolysis brings together such families of science as Ultimate tensile strength, Charcoal, Composite number, Biocomposite and Pulp and paper industry. His studies in Soil water integrate themes in fields like Environmental chemistry and Agronomy. The Environmental chemistry study combines topics in areas such as Partition coefficient and Sorption. Ajit K. Sarmah mainly investigates Biochar, Environmental chemistry, Soil water, Sorption and Adsorption. His Biochar research includes elements of Composite material, Polypropylene and Pulp and paper industry. His Total organic carbon study in the realm of Environmental chemistry connects with subjects such as Estrone and Hexazinone. In his research on the topic of Soil water, Water content is strongly related with Agronomy. His Sorption study integrates concerns from other disciplines, such as Partition coefficient, Hydrophobic effect and Freundlich equation. His research in Adsorption intersects with topics in Inorganic chemistry, Zeta potential and Aqueous solution.

ICRER 2022 Keynote Speakers:

COMMITTEE

Conference Co-Chairs
Kaimin Shih, The University of Hong Kong, China
Gordon Huang, University of Regina, Canada
Conference Program Chairs
Xueming Chen, Fuzhou University, China
Ajit Sarmah, University of Auckland, New Zealand
Conference Publication Chair
Chaolei Yuan, Sun Yat-sen University, China
Conference Steering Committee
Mohamed El-Din, University of Alberta, Canada
Satya Harpalani, Southern Illinois University Carbondale, USA
Conference Technical Committee
Zhen Hu, Shandong University, China
Eric James Strauss, Michigan State University, USA
Hasan Aydogan, Istanbul University, Turkey
Ali Cheshmehzangi, University of Nottingham Ningbo, China
Saad Abdel-Hamid El-Syaed, Mechanical power engineering-Zagazig University, Egypt

More information on ICRER 2023 Committee:

CALL FOR PAPERS

Topics of interest for submission include but are not limited to:

Topic 1: Environmental Science and Technology

- Mechanism of multi-media migration and transformation of new pollutants
- Treatment and recycling technology of high salt wastewater
- Collaborative governance mechanism and key path of atmospheric pollution reduction and carbon reduction

Topic 2: Environmental Ecological Engineering

- Ecosystem Management and Sustainable Development
- Global environmental change and ecosystems management
- Environmental restoration and ecological engineering
- Habitat reconstruction

Topic 3: Resources and Environment Engineering

- Water Resources Management and Water Pollution Control
- Atmospheric science and air pollution control
- Solid Waste Pollution Control and Resource Utilization

More topics please visit: http://www.icrer18.org/cfp.html

PUBLICATION & INDEX

ICRER 2023 Conference presented and registered full papers will be included in conference proceedings, which will be submitted to **EI Compendex, Scopus**, SCImago and other major databases for indexing.

PUBLICATION HISTORY

ICRER 2022 publication- Springer Book Series Environmental Science and Engineering (ISSN: 1863-5520) to be Indexed by **EI Compendex, Scopus**
ICRER 2021 publication-IOP Conference Series: Earth and Environmental Science (EES) (ISSN: 1755-1315) Volume 1048, Indexed by **Scopus**
ICRER 2020 publication-IOP Conference Series: Earth and Environmental Science (EES) (ISSN: 1755-1315) Volume 726. Indexed by **EI Compendex, Scopus**
ICRER 2019 publication-IOP Conference Series: Earth and Environmental Science (EES) (ISSN: 1755-1315) Volume 432. Indexed by **EI Compendex, Scopus**

IMPORTANT DATES

Submission Deadline:	June 30, 2023
Notification Deadline:	July 25, 2023
Registration Deadline:	August 15, 2023
Conference Dates:	December 2-4, 2023

SUBMISSION METHODS

Email:
icrer_secretary@163.com
Electronic System:
http://confsys.iconf.org/submission/icrer2023

CONTACT

ICRER 2023 Website: www.icrer18.org
Contact Email: icrer_secretary@163.com
Contact Number: +86 -17311381986
Conference Secretary: Ms. Vera Liao

ORGANIZED BY BIEET

SUPPORTED BY The University of Nottingham Ningbo, China; QATAR UNIVERSITY

Listener Registration http://confsys.iconf.org/register/icrer2023
